OBJECTIVE

Highly motivated and curious software developer with a passion for building scaleable and efficient systems. Confident in the ability to bring value to the team while gaining real-world experience. Eager to take on new challenges and opportunities that will help grow both personally and professionally.

EXPERIENCE

Backend Developer

Aug 2023 - Present

Billeasy E - Solutions Pvt. Ltd

Mumbai

- Developed Loyalty program for **Belgian Waffle** which is running on **280+ stores PAN India**.
- Developed scratch-card feature which is currently running on **Mumbai, Hyderabad and Pune Metro's**.
- Managed **client relations** for the company running Hyderabad's shuttle service, seamlessly integrating them into the **E-ticketing** product.
- Customized the system to meet client needs, integrated it with **SMS** service and developed **WhatsApp bot**, enhancing functionality and user experience.
- Revamped an existing repository by transitioning from **JavaScript to TypeScript** and migrating from **Loop-Back to Express.js**.
- Contributed to the **redesign and migration** efforts, facilitating the shift from a **monolithic architecture** to a more **scalable microservices architecture**.

Backend Developer

Jan 2022 - Sept 2022

Dsigma LLP

Mumbai

- Designed and developed an optimized **CRM backend** for Crinitis with features like **Employee Management system, Kiosk system, Admin panel**, etc.
- Utilized technologies such as **ExpressJS, PostgreSQL, and Sequelize**, etc.
- The company saved around **18,000+ AUD per year** by replacing their paid system with new software.

FREELANCE

Autosys (Nov 2023 - Dec 2023) ([Playstore](#))

- Developed a dedicated backend server for a smart home company and migrated the backend from **firebase** to **expressJs** server.
- Leveraged **MQTT** to implement robust communication channels between **IoT devices** and the mobile application, optimizing data flow.
